I am a self-taught software developer with a strong passion for learning and hands-on experience in building both web and mobile applications. I am familiar with modern front-end and back-end frameworks such as Next.js and Node.js using JavaScript, and I also have experience in mobile development with Flutter (Dart). In addition, I am comfortable working with Golang. For me, software development is not just about writing code it's about creating meaningful, impactful, and user-friendly solutions.

Work Experience

Find Community – Bandung, Indonesia

Sep 2025 – Oct 2025

Web Developer Intern

- Contributed to the development of the company's landing page using modern frontend technologies.
- Responsible for the process from design to implementation of the user interface.
- Ensured the website was fully responsive and provided a seamless user experience across devices.
- Access online in [findcommunity.vercel.app](#)

PT. Solusi Teknologi Industri – Jakarta, Indonesia

Des 2025 – Apr 2026

Fullstack Engineer Intern

- Developed a multi-tenant SaaS application using Golang, PostgreSQL, Redis Streams, Docker, and Next.js, enabling scalable and efficient management for multiple clients within a single platform.
- Implemented a microservices architecture to improve scalability, maintainability, and system reliability across backend services.
- Integrated secure payment gateway systems to support reliable online transactions within the application.
- Built and maintained both frontend and backend features, ensuring seamless integration between services and user interfaces.
- Maintained clean, consistent, and highly readable code by applying best practices, coding standards, and collaborative development workflows.

Project Experiences

Virsas Schedule

Oct 2024 – Dec 2024

Full-stack Developer

- Developed a collaborative task management web application with features for creating, updating, and organizing tasks.
- Implemented a Kanban board for better workflow visualization and task tracking.
- Enabled multi-user collaboration, allowing users to manage and assign tasks together in real-time.
- Designed a responsive interface to ensure usability across desktop and mobile devices.
- Access online in [virsas-schedule.vercel.app](#)

Muslim Fashion Brand

Agst 2025 – Sept 2025

Full-stack Developer

- Built an e-commerce website for Aladdin, a Muslim fashion SME, featuring a homepage, product catalog, and product detail pages.
- Implemented a checkout system that automatically updates the admin dashboard with order data.
- Designed an admin dashboard for product management and to track order statistics and monthly income.
- Ensured the platform is fully responsive and accessible across devices.
- Access online in <https://github.com/wahidanDev/umkm-project-akhir>

Laundry Management System

Feb 2025 – Mar 2025

Back-end Developer

- Built an API-based laundry management system to streamline order and customer management.
- Implemented features for handling orders, customer records, and employee workflows efficiently.
- Designed RESTful API endpoints to support integration with potential front-end or mobile apps.
- Ensured the system was optimized for fast performance and reliable data handling.
- Access online in <https://github.com/wahidanDev/golang-laundry>.

Inventory Warehouse System

Mar 2026 – Apr 2026

Full-stack Developer

- Developed a fullstack inventory warehouse application using Golang and Next.js to manage operational workflows efficiently.Implemented a Kanban board for better workflow visualization and task tracking.
- Implemented core features such as product management, category management, and warehouse management to support structured data handling.
- Built inventory movement tracking to monitor stock in/out activities in real-time.
- Created a dashboard for visualizing key metrics and system insights to support decision-making.
- Implemented audit logs to track user activities and ensure data transparency and accountability.
- Designed a scalable backend architecture and responsive frontend interface for optimal performance across devices.

Educational Background

SMA Negeri 8 Bandung

Agst 2018 – Mei 2021

Certificates

The Complete Full-Stack Web Development Bootcamp – Agustus 2025

Udemy

Dart & Flutter | The Complete Flutter Development Course – September 2025

Udemy

Pengembangan Web dengan Node.js dan React – Oktober 2025

Badan Nasional Sertifikasi Profesi (BNSP)
